Subject: Arizona Data-AI-Quantum Centers and BESS Projects

Your Honors:

Submittal was made to you on July 17, 2026, of an essential paper titled Why Arizona Needs a Ban on Data Centers: Truth be Told. Chapter two, of said paper titled Arizona Quantum Centers and Battery Storage Systems, and the former paper is attached hereto and made a part hereof by reference. ¹ ²

With the Arizona water crisis and proliferation of centers in Arizona it is necessary and imperative that the serious look now be moved into positive mode upon Data-AI-Quantum centers and BESS projects by direct executive action to prevent harm to humans, the environment, ecosystems, wildlife and property.

More importantly when considering Federal law and regulations and what the federal government is moving forward with against China it is incumbent to completely take into account a ban and not a moratorium. In doing so the adage has been that “what is unlawful cannot be made legal by actions, a stroke of a pen or a vote.”

Respectfully,

Brad Follett
